PROJECTS

weather App

🔗 https://gorgeous-salmiakki-8e546a.netlify.app

- Description : This app is a dynamic weather application that provides real-time weather information for any location around the world. This application was built using React.js and leverages the power of the useState hook to manage the application's state and the Fetch API to retrieve weather data from a weather API service.

Recipe Finder

🔗 https://bejewelled-vacherin-7e310d.netlify.app

- Description : RecipeFinder is an exciting React application that lets users explore and discover a wide variety of recipes. Built with a focus on user experience, this app employs the power of React's semantic tags, the useState hook, and the Axios library for fetching data from a recipe API. Whether you're a culinary enthusiast or a beginner cook, RecipeFinder is here to inspire your kitchen adventures.

Text Editor

🔗 https://lambent-cat-91629f.netlify.app

- Description : The ReactTextEditor is a versatile and user-friendly text editing application built with React.js. This app provides users with a powerful platform to create, edit, and format text documents efficiently and creatively. Whether you're drafting an article, writing code snippets, or taking notes, ReactTextEditor offers a range of features to enhance your writing experience.
